How to modify BB audit report

It is possible to modify the data presented in ID Builder's Audit Report using Script.

Go to **Script** tab and choose the **Audit Successful Print** event.

Add the database columns which you would like to be added to the report.

Sample script: `currentRecord['Employee ID'] + " " + currentRecord['First Name'] + " " + currentRecord['Last Name'] + "This record was printed";`

The data will then be added to the Audit Report.
