How to concatenate multiple fields

Start by connecting your database to your design.

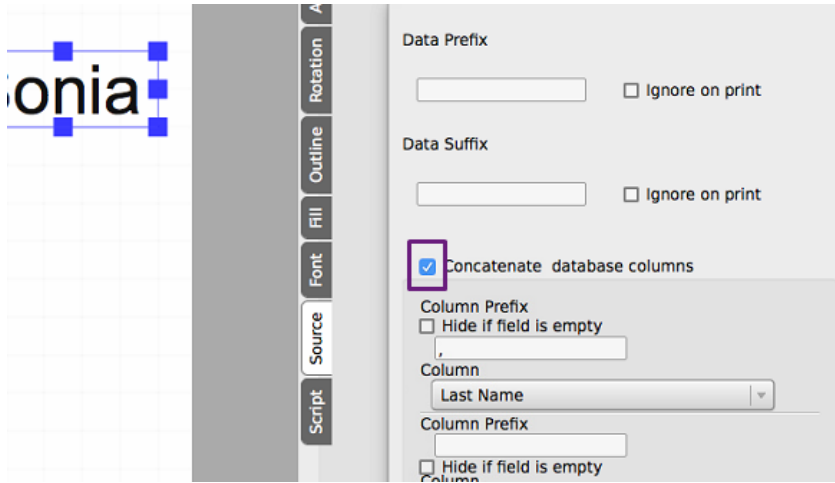

Drag and drop the to the card layout the database column that you want to concatenate.

With the text item selected go to **Source** tab and click **Concatenation** option.

Check **Concatenate database columns**.

Write a comma (,) in the empty text box for the second column's prefix and choose the database column you want to concatenate.

After the configuration click **OK**, the concatenated field will appear on your design.
