<sup>1</sup> For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.  
<sup>2</sup> Cards ordered with plain white front and back packaging, or custom artwork, will still have a small HID logo and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card. The majority of part numbers are marked with sales order number, a custom part number is required to omit all marking from the card. Contact your local support representative for details.  
<sup>3</sup> The Printed card number is placed in the bottom right-hand corner on the back of the card.  
<sup>4</sup> For Laser Engraved Printed numbers, consult factory for lead times and cost.  
<sup>5</sup> Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards.  
<sup>6</sup> The ability to add a horizontal slot punch requires a different iCLASS antenna design. Users can expect a read range reduction of approximately 20% if they order options B or H for the Slot Punch.  
<sup>7</sup> Please note that cards shipped within the Americas are always laser-engraved. Inkjetted option is not available for these cards.  
<sup>\*</sup> The composite construction is recommended for all cards with over-laminate applied. Consult with the printer manufacturer prior to ordering.
